Power to Gas and Power to X

24th July 2018 | Smart Energy Asturias | Lukas Lueke

thyssenkrupp Uhde Chlorine Engineers

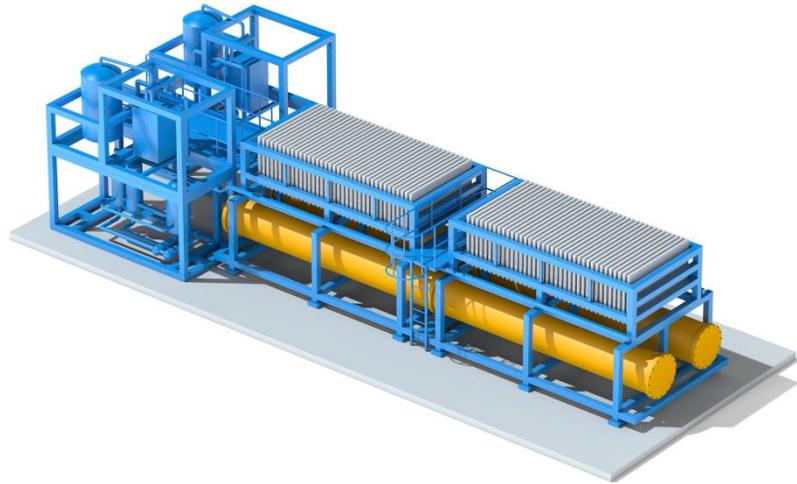

Water Electrolysis

key technology for sustainable hydrogen value chains

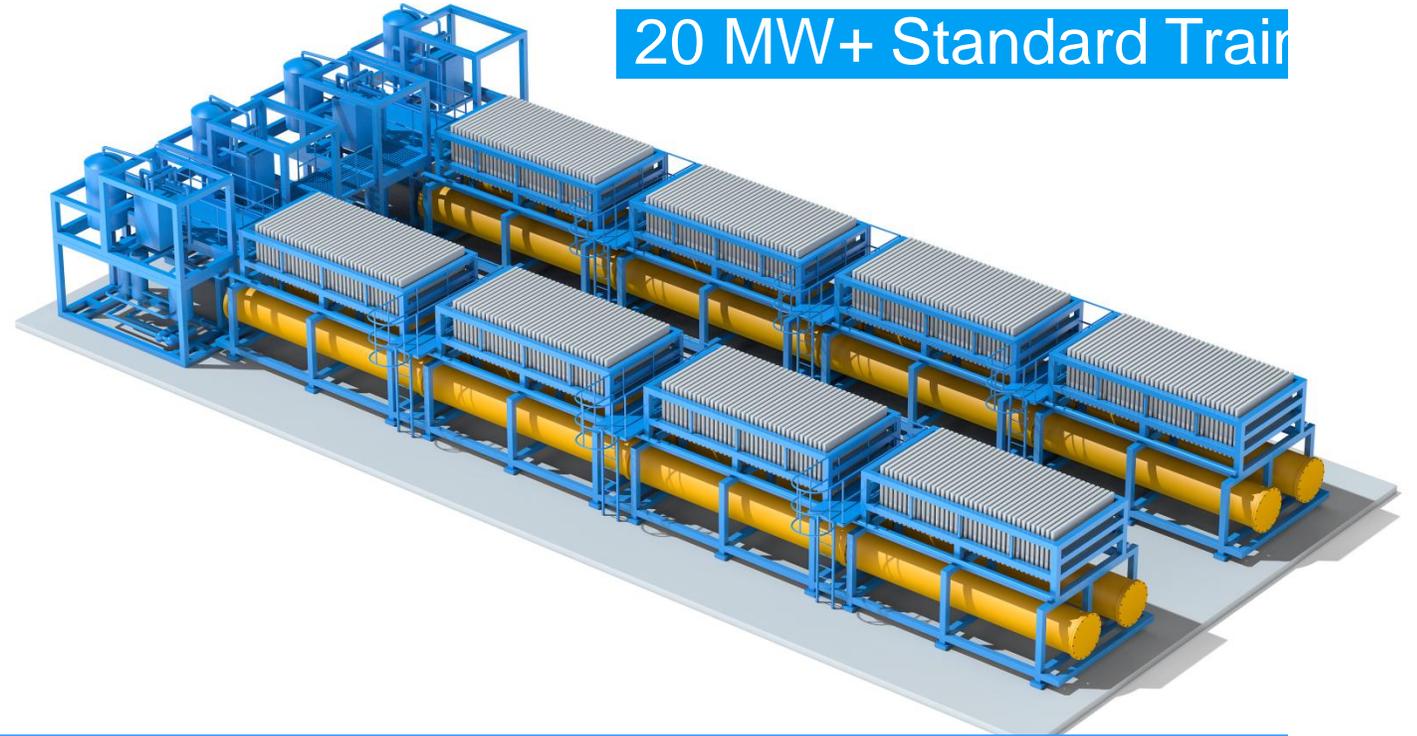

Our design philosophy: highly modular and standardized on prefabricated skids

5 MW Standard Module

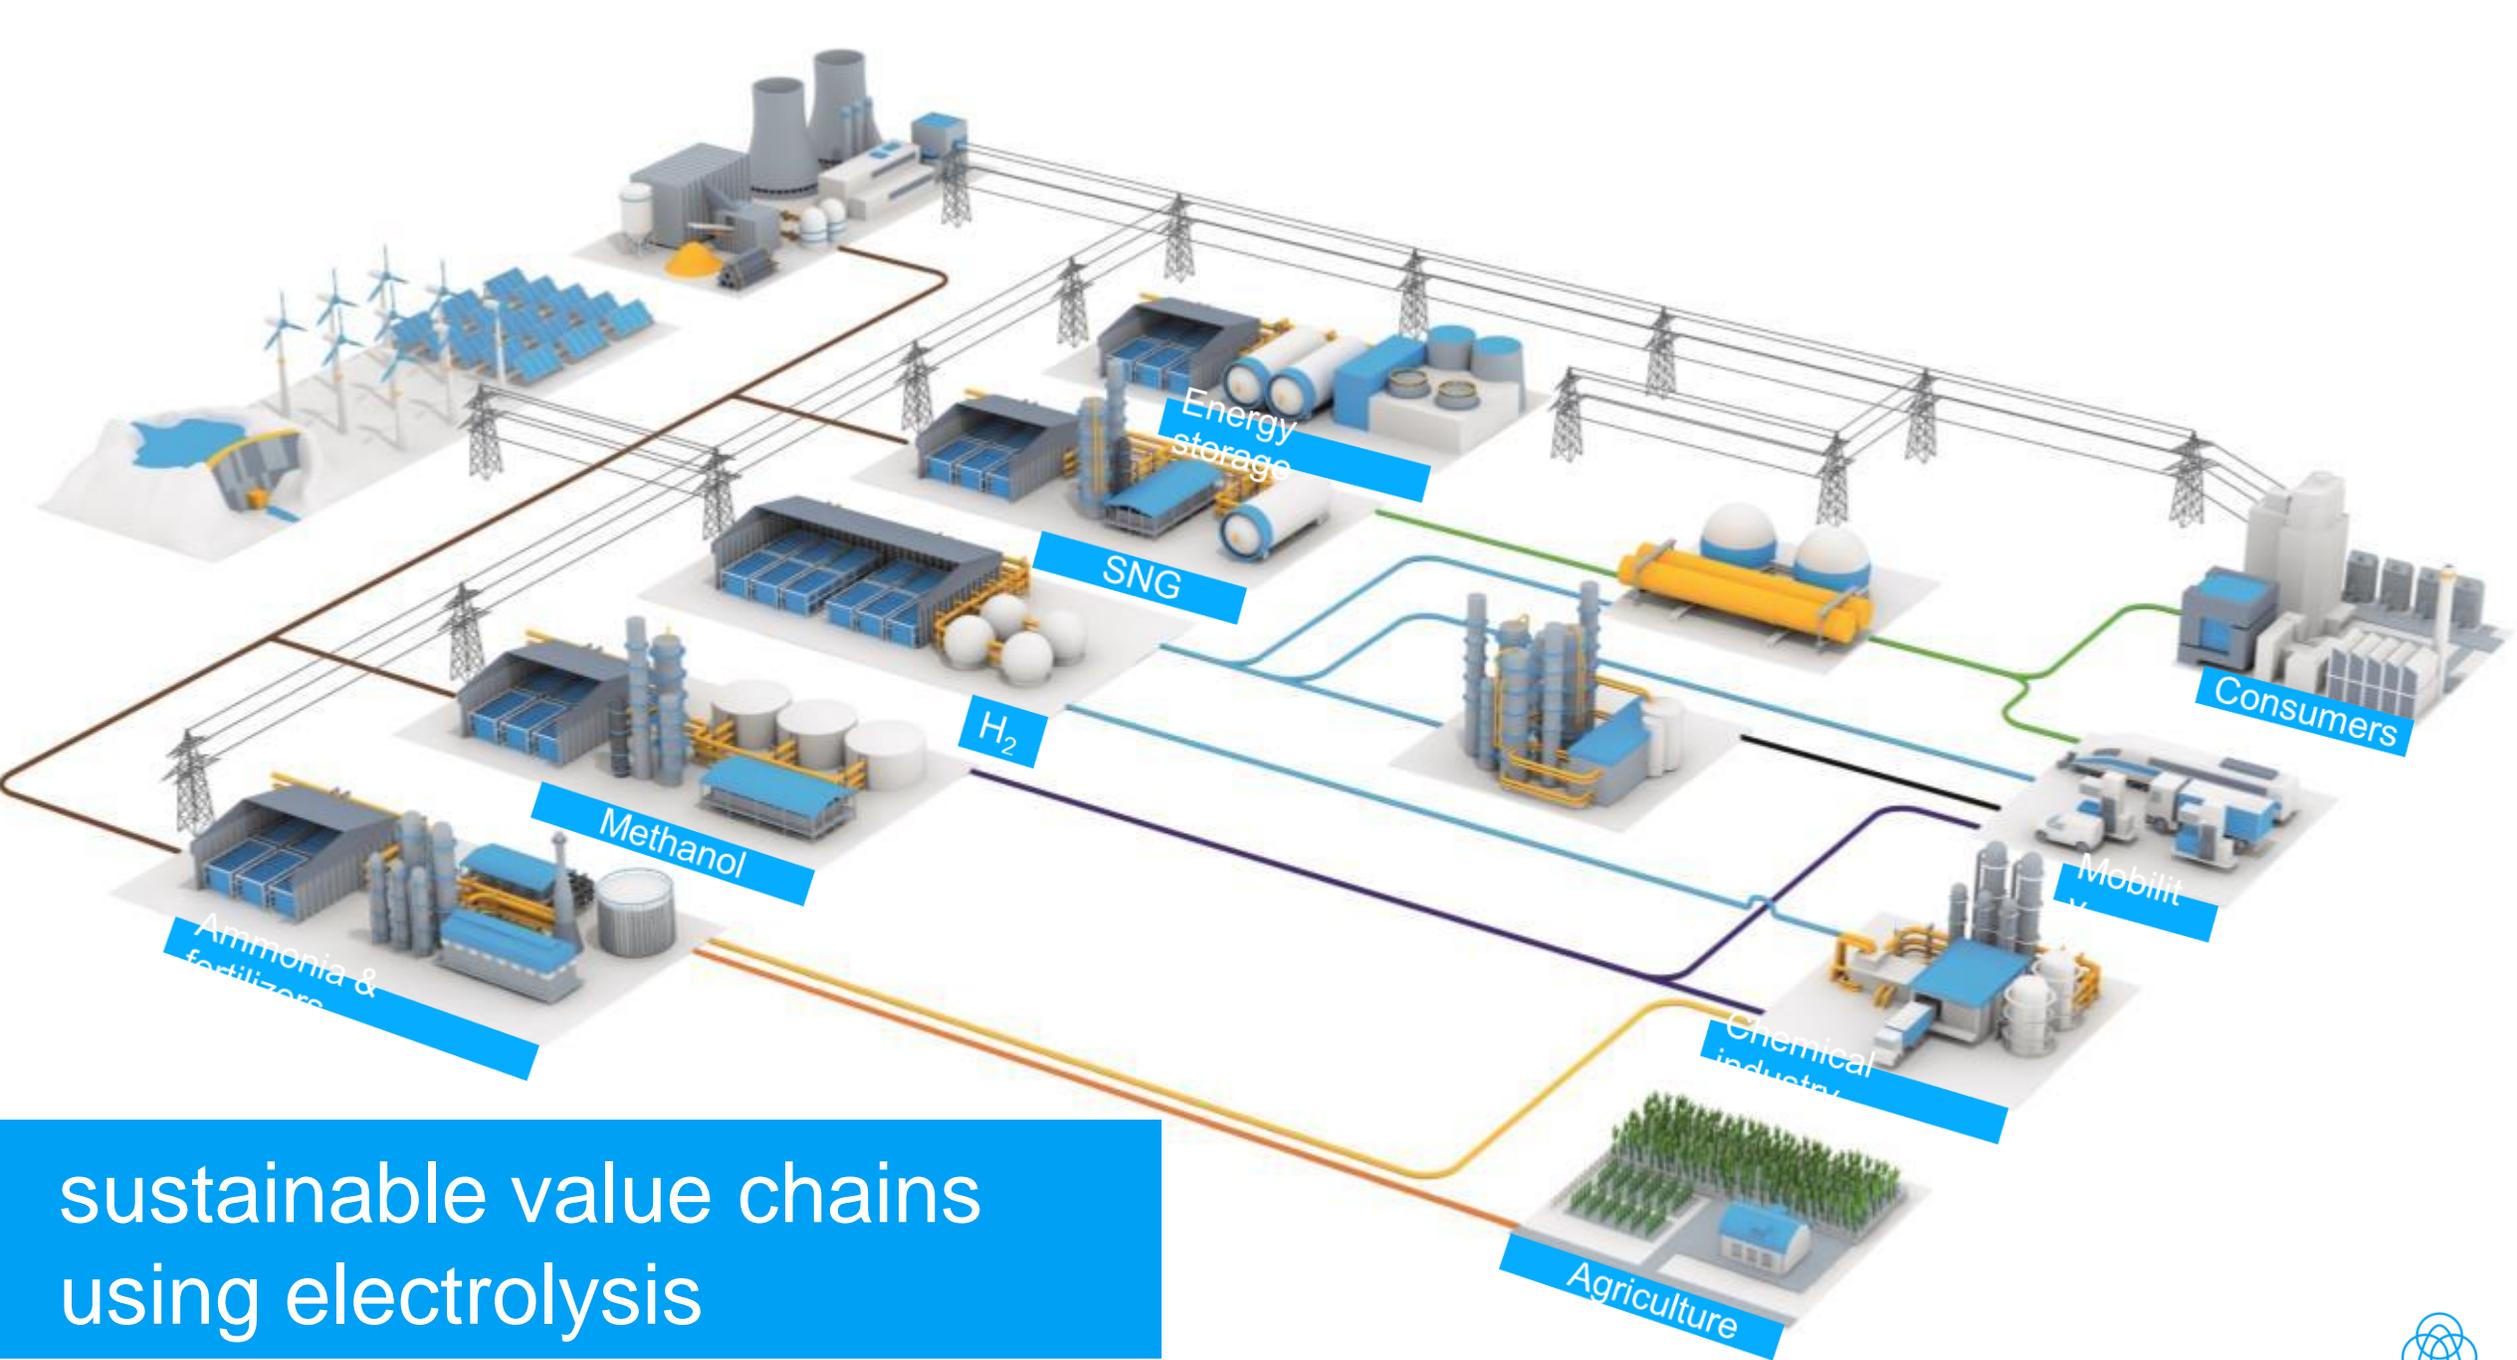

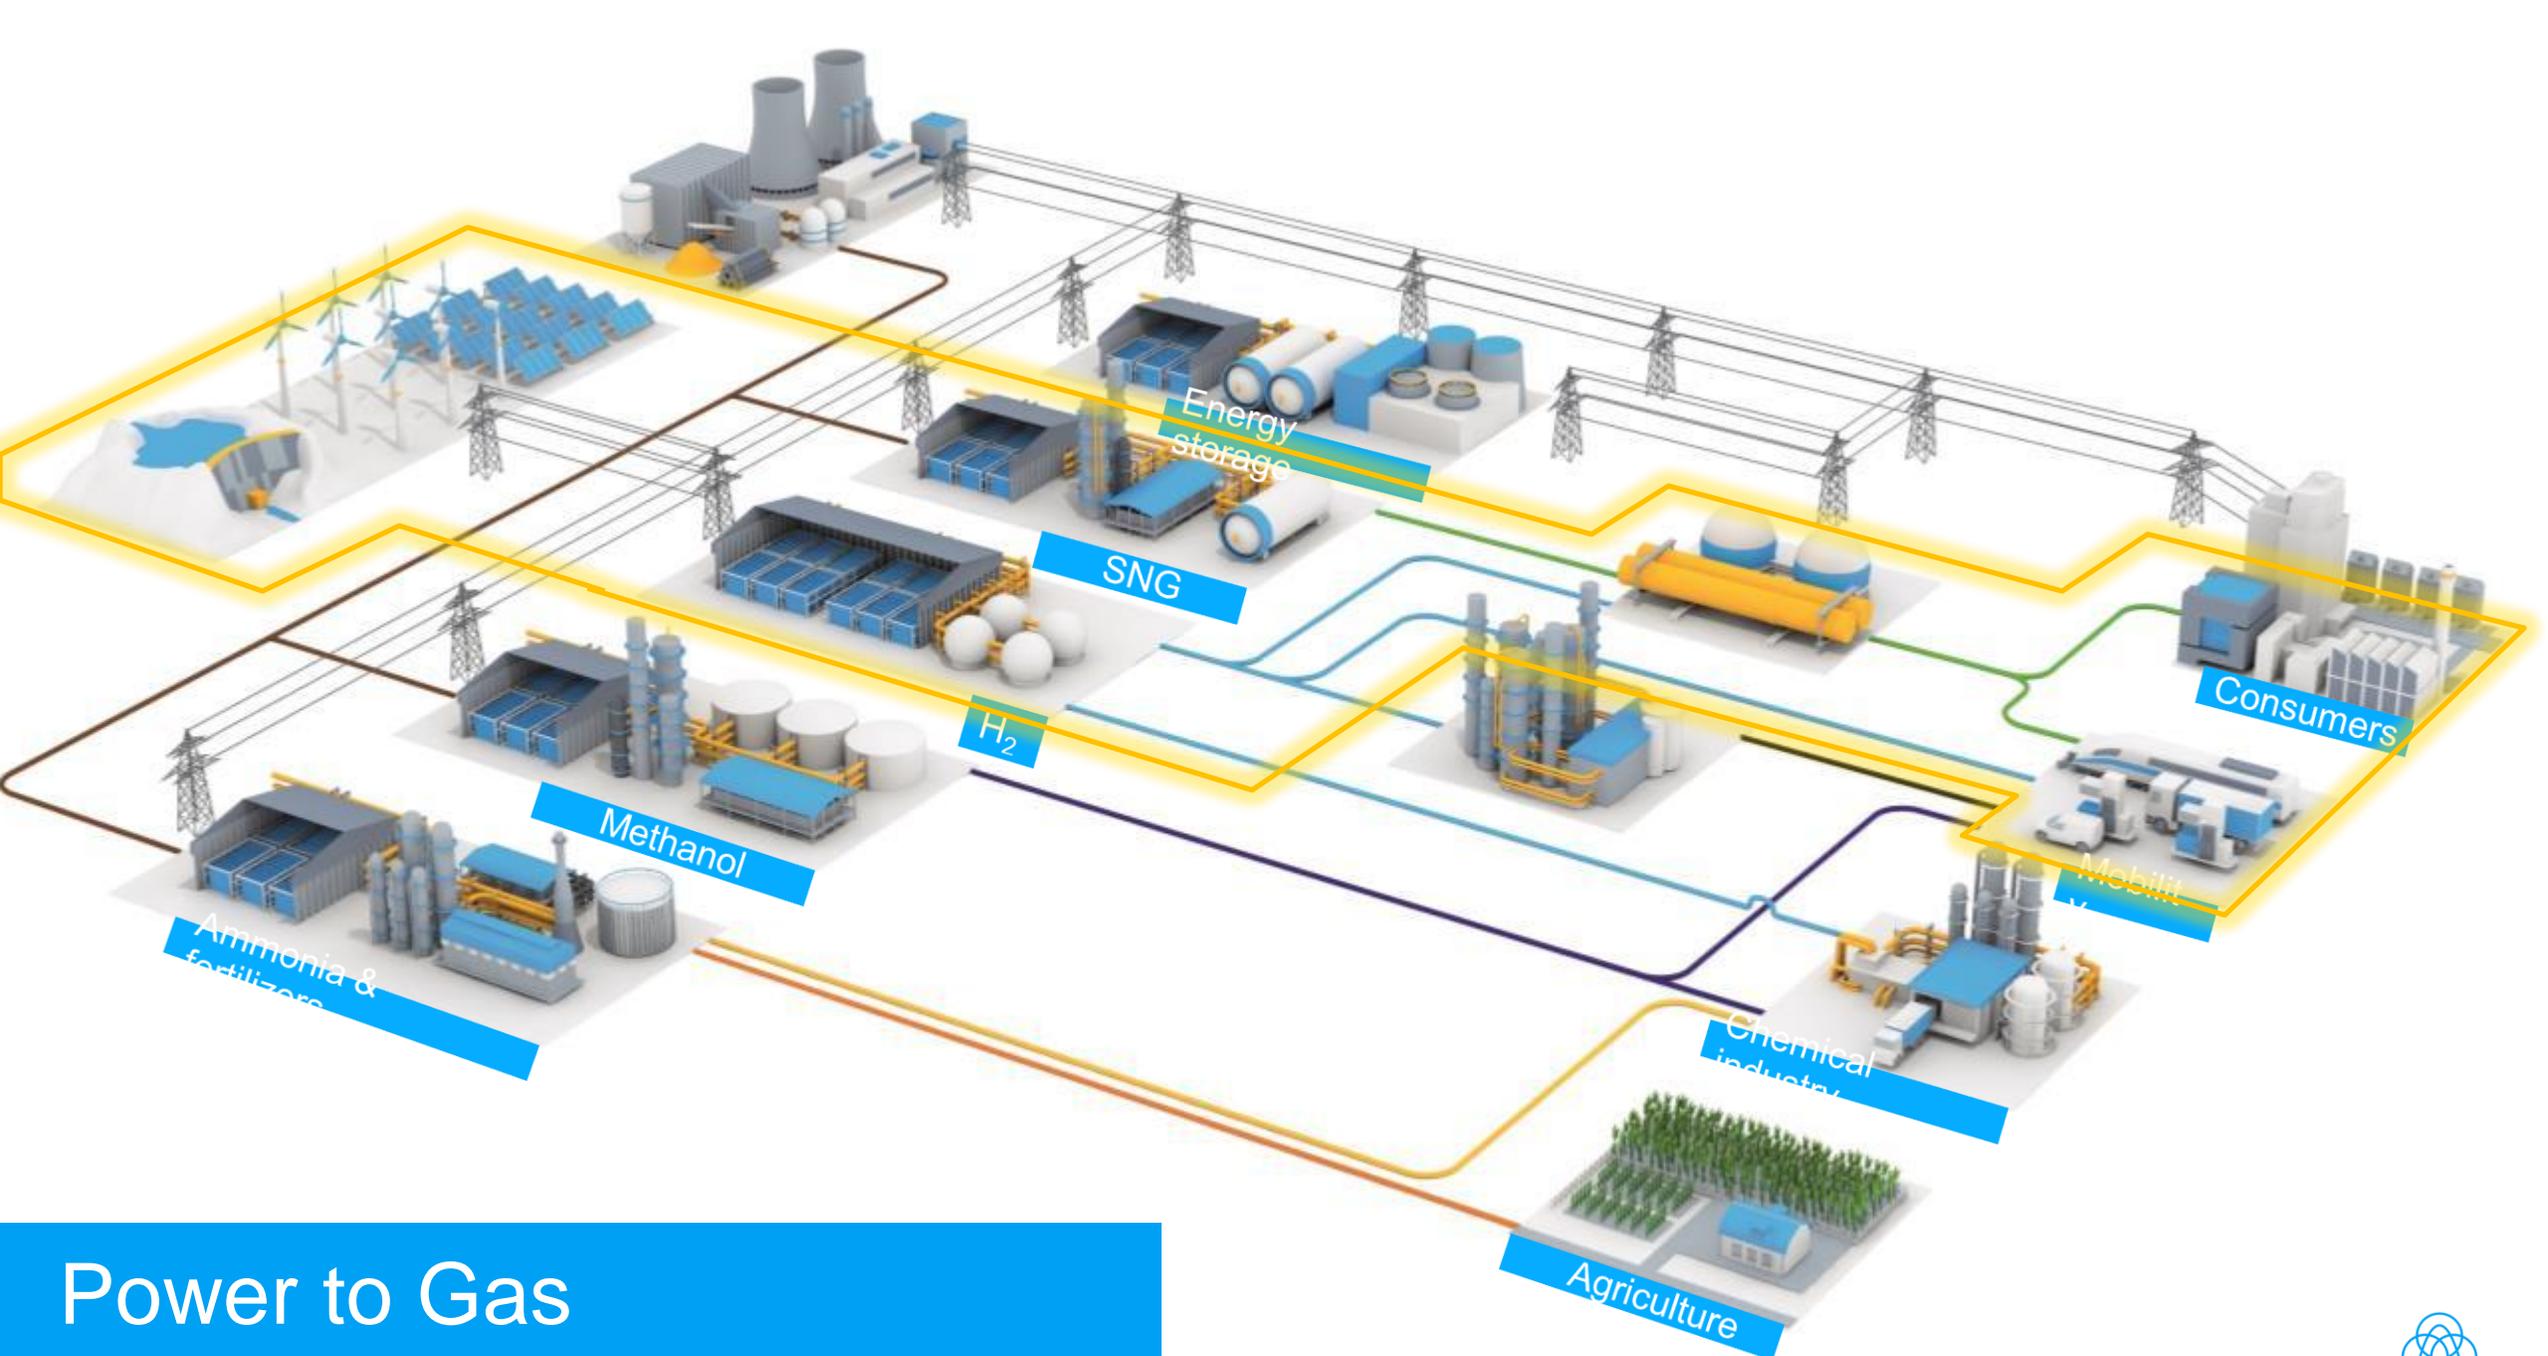

20 MW+ Standard Train

- Standardized, skid mounted electrolysis modules for cost efficient deployment at site.
- Area required for a 100 MW electrolysis plant is about 3000 m².
- Optional downstream processing equipment: compression, oxygen removal and drying

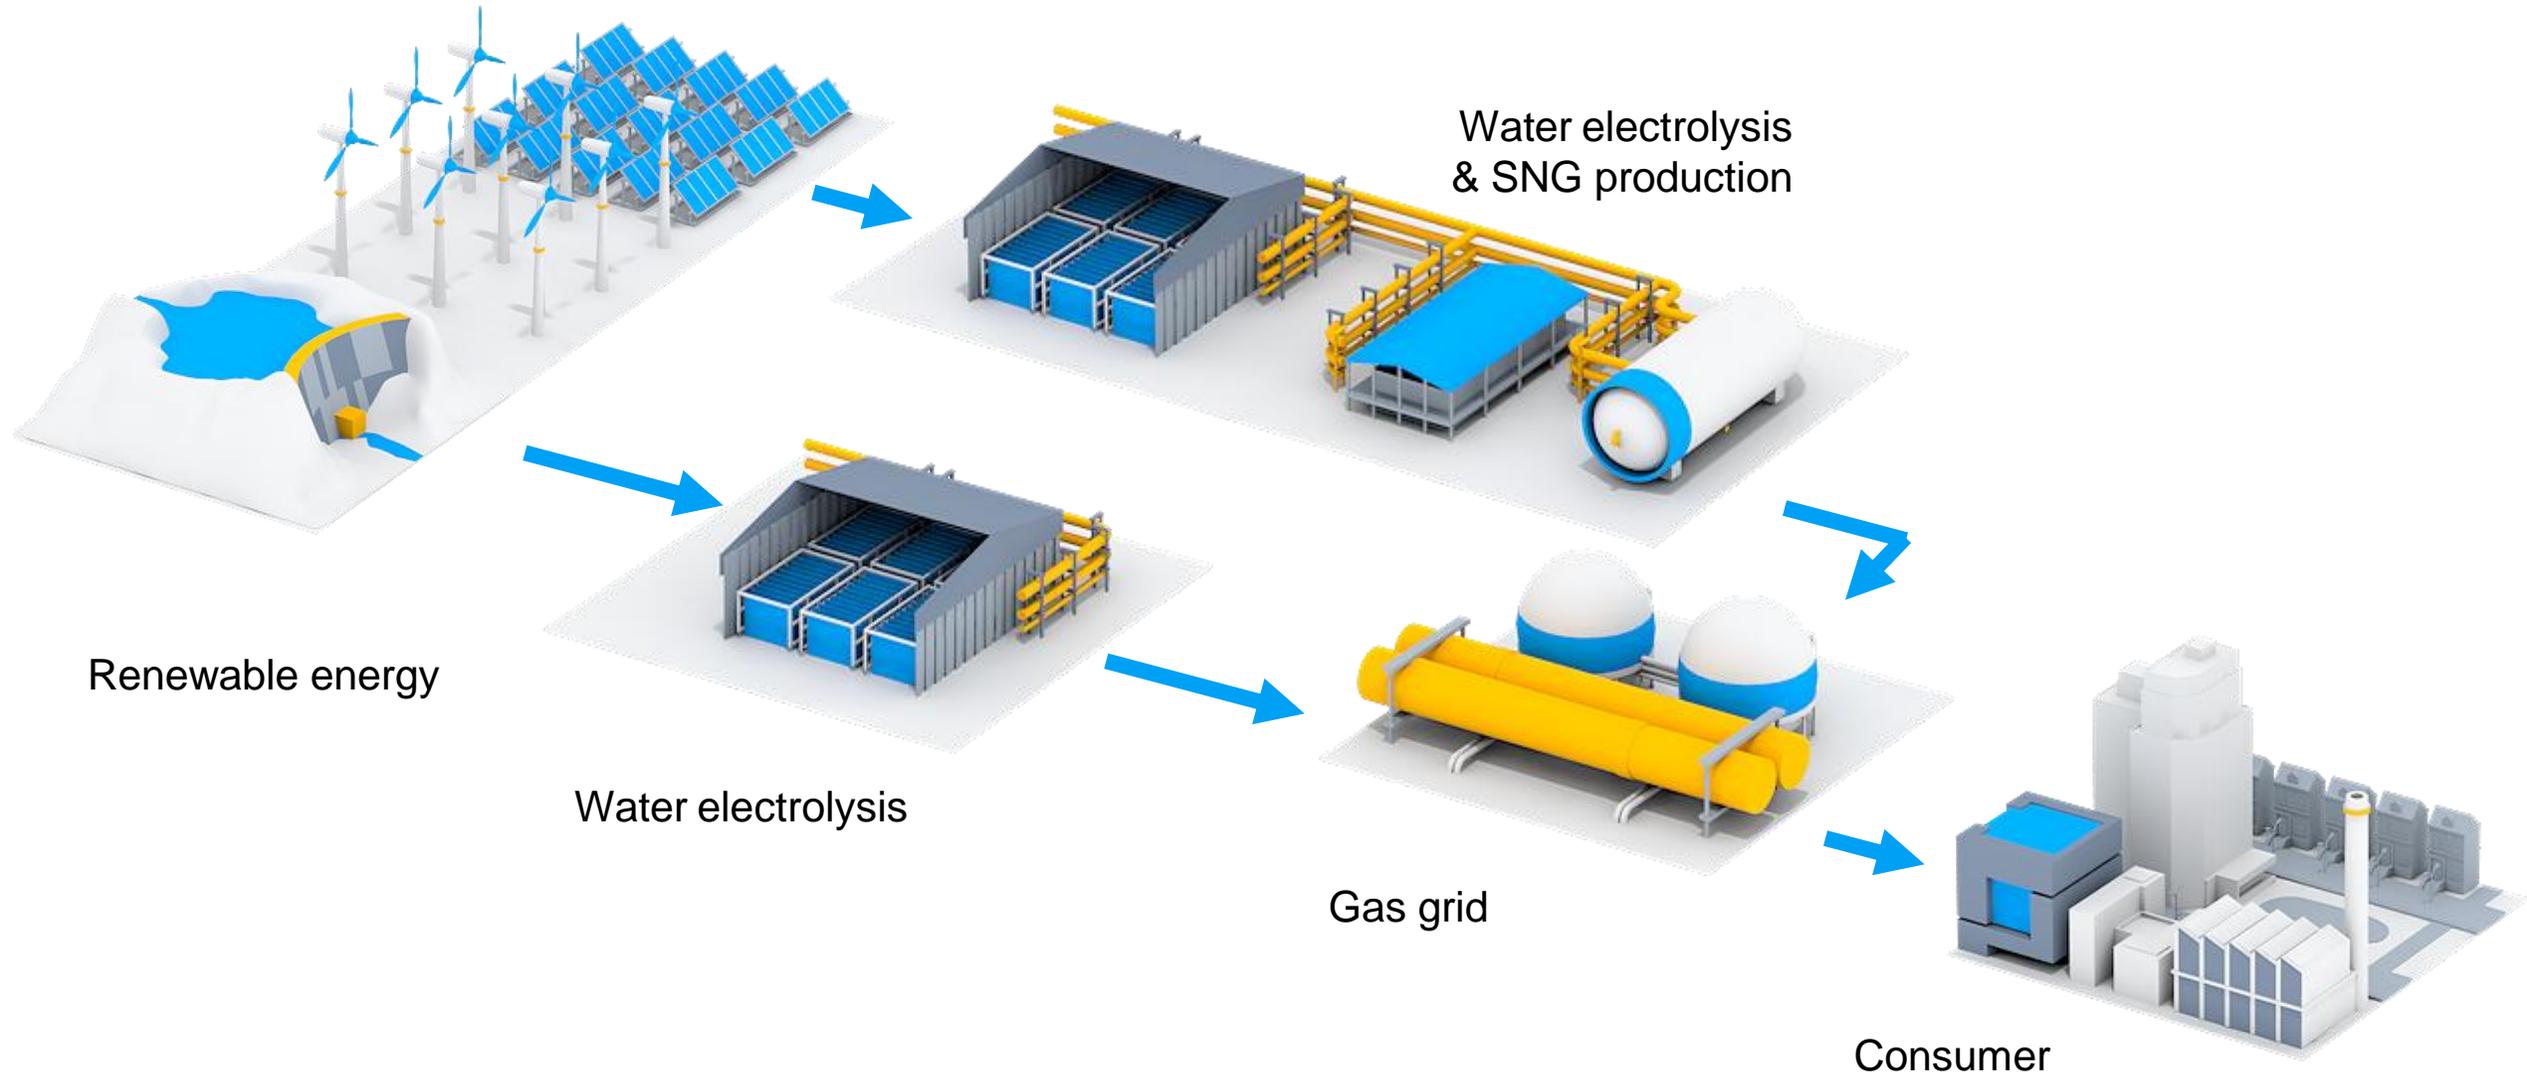

Power to Gas

Power to Gas

Power to Gas Projects in Germany

Germany	
E.ON - Falkenhagen 2 MW 2013 – 5 M€ e-on HYDROGENICS SWISSGAS	ENERTRAG – Prenzlau 500 kW 2012 - 21M€ ENERTRAG TOTAL VATTENFALL b-tu DB Energy Services AG NOW
E.ON - Hambourg 1 MW 2014 – 13,5 M€ e-on HYDROGENICS SolviCore	Thuga 360 kW 2013 thuga ITM POWER
RWE – CERAM HYD 100 kW 2013 RWE CERAM HYD	CO2RRECT 100 kW 2012 18 M€ RWE SIEMENS
Audi « e-gas » 6,3 MW 2013 entre 20 et 30 M€ Audi ETOGAS Fraunhofer EWE SW	RH2 – WKA 1 MW 2013 9,72 M€* HYDROGENICS
Energiepark Mainz 6 MW 2014 ~17 M€ Linde SIEMENS	H2BER Wind gas Hassfurt SHELL (10MW)

*pour la partie Hydrogène uniquement. Le projet est doté de 220 M€ pour la construction d'une ferme éolienne de grande envergure

Power to X

Renewable ammonia

2 worldwide leading processes

1 holistic solution

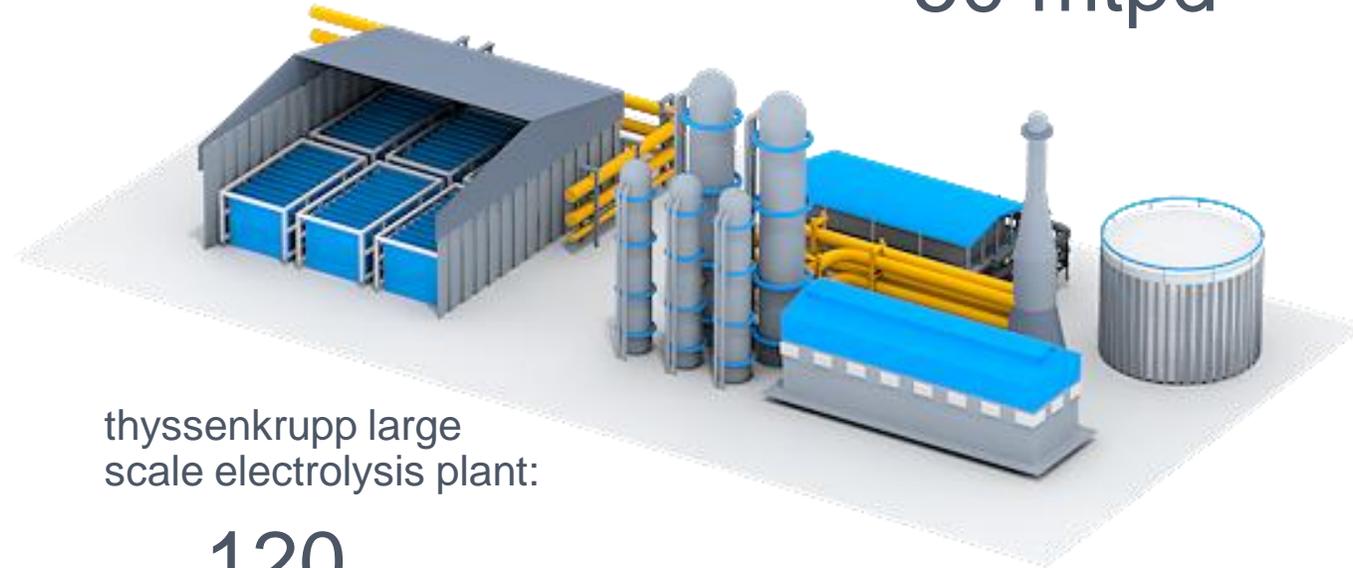

0 CO₂ emissions*

thyssenkrupp electrolysis plant:

20 MW

thyssenkrupp smallest scale ammonia plant:

50 mtpd

thyssenkrupp large scale electrolysis plant:

120 MW

thyssenkrupp small scale ammonia plant:

300 mtpd

*depending on E-power source

Availability of renewable energy is key

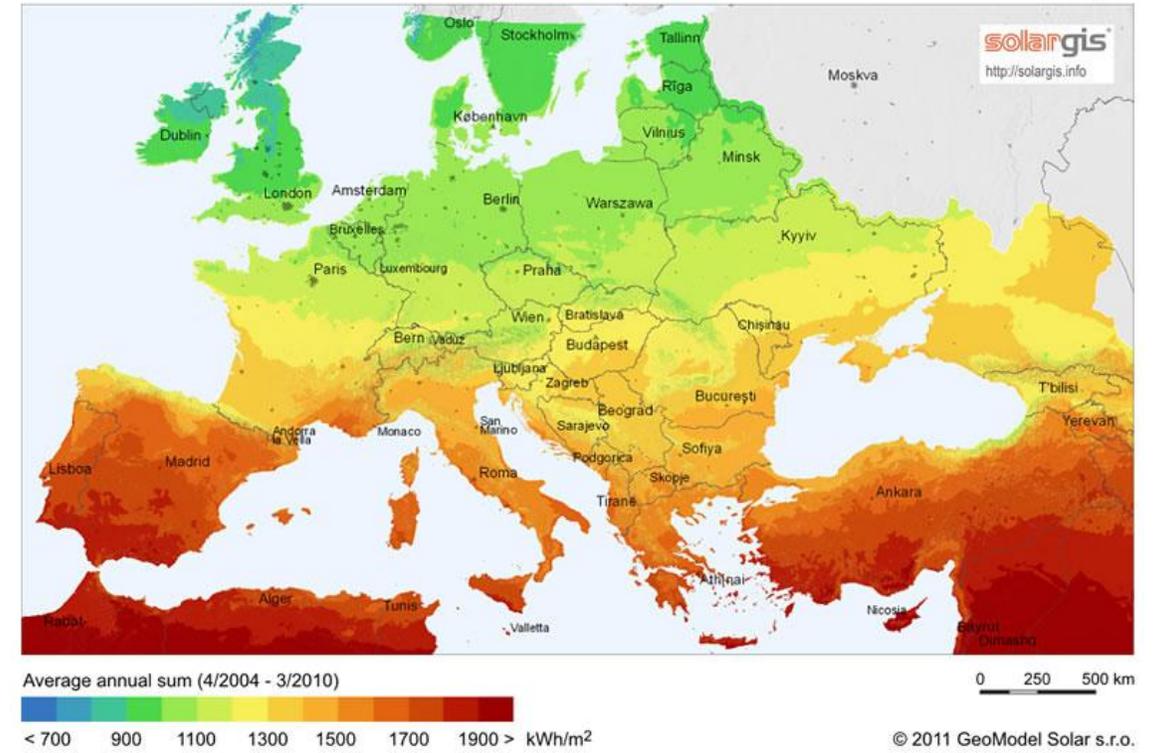

WIND MAP OF SPAIN
Annual Mean Speed at 80 m high

Cost for electricity strongly affects business case – example case H₂ production

Cost overview

Sensitivity analysis

The Future: Offshore solutions?

The renewable energy age is unstoppable...

... energy storage and carbon conversion are
key

A photograph of four wind turbines in a field of green crops, likely rapeseed, during a sunset. The sun is low on the horizon, creating a warm orange and yellow glow. The turbines are silhouetted against the bright sky. The field in the foreground is filled with small yellow flowers.

thyssenkrupp provides solutions for
integrating

and leveraging renewables and recycling
carbon
